URL to Your Coding Assignment Video:https://1drv.ms/v/s!AkOMpIEbP9hzj0o4HgkkLwopT37i?e=jXfidy

After watching the video, *Source Control with git,* you should have already set up a GitHub account for this program.

If you have **not** setup your GitHub account, **review the above video in the** *Week 3: Weekly Videos and Curriculum* and set your account up before proceeding with this assignment.

Instructions:

- Create a new repository on GitHub for this week's assignments and push this document, and any files that you have created to the repository.

- Include the URLs for this week's repository and video where instructed.

- Submit this document as a .PDF file in the LMS.

Assignment Steps:

- The link below has a zipped file that contains an empty directory (folder) for your assignments.
- Download the file to your computer and unzip it.
- This directory (folder) should be used to organize each week's projects in the course.
    https://drive.google.com/file/d/1 HYPERLINK "https://drive.google.com/file/d/1WDc_WJ8I0MfwbrbmtMsxHdTpupZsPjXT/view"W HYPERLINK "https://drive.google.com/file/d/1WDc_WJ8I0MfwbrbmtMsxHdTpupZsPjXT/view"Dc_WJ8I0MfwbrbmtMsxHdTpupZsPjXT/view

- Following the Git/GitHub tutorial in your week 0 video:

    - Create a directory (folder) inside **Week 03** directory

    - Create a repository on the GitHub website.

    - **Push** your directory of files to GitHub as instructed in the video.

    - After your first push, please ensure that you make some changes to your directory (folder), such as adding a new file or changing your code.

- **Push** those changes to your repository a second time (as shown in the video).

  https://www.youtube.com/watch?v=NGeksLUB1e8

- When complete, paste a screenshot of your terminal or command prompt that shows the commands above completed.

Video Steps:

- Create a video, up to five minutes max, showing and explaining exactly what you did for this assignment Git/GitHub.

- This video should be done using screen share and voice over.

- This can easily be done using Zoom, although you don't have to use Zoom, it's just what we recommend.
  - You can create a new meeting, start screen sharing, and start recording.
  - This will create a video recording on your computer.

- This should then be uploaded to a publicly accessible site, such as YouTube.
  - Ensure the link you share is **PUBLIC** or **UNLISTED**!
  - If it is not accessible by your grader, your project will be graded based on what they can access.
